

Drop Spreader

Autonomously spread salt and sand with the RT-1000

Tackle slippery sidewalks and icy bike paths. Attach the Drop Spreader to the back of the RT-1000 robot. The heavy-duty box holds up to 480 pounds of salt, sand, or other solid deicer mixes. The drop spreader features an internal auger and vibrating baffles so deicer material keeps moving even in freezing temperatures.

Save money on expensive deicer materials too. With a few clicks in the Robot Operations Center, tell the robot when, where, and how much material to drop at a job site.

Compatible with:

- RT-1000 Tractor

SPECS
Type: Rear Attachment
Weight: ~175 lbs.
Dimensions: 24" L x 49.5" W x 28" H
Spreader Type: Drop; Auger drive with vibrating baffle
Spread Width: 36"
Capacity: 6 cubic feet (volume); 480 lbs. (weight)
Power: Electric motor; variable speed and drop rates

Compatible Materials:

- Sand / Salt Mix
- Bagged Ice Melters
- Bagged Rock Salt
- Bulk Salt
- Calcium Chloride Pellets
- Calcium Flakes
